The replay will be available for 48 hours starting approximately 2 hours after completion of the call

About AmpliPhi Biosciences

AmpliPhi Biosciences Corporation is a biotechnology company pioneering the development and commercialization of therapies for antibiotic-resistant infections using bacteriophage-based technology. In May 2017, AmpliPhi announced a new strategic emphasis on developing precisely targeted and personalized bacteriophage therapies for patients with serious or life-threatening antibiotic-resistant infections. AmpliPhi has reported results from two Phase 1 clinical trials of AB-SA01, one for the treatment of *Staphylococcus aureus* in chronic rhinosinusitis patients (safety and preliminary efficacy) and one to evaluate the safety of AB-SA01 when administered topically to the intact skin of healthy adults. AmpliPhi has additional bacteriophage-based preclinical products in development, including for the treatment of *Pseudomonas aeruginosa* infections. AmpliPhi has received positive feedback from the U.S. Food and Drug Administration (FDA) and UK Medicines and Healthcare products Regulatory Agency (MHRA) on its development plans.
